B. Agrometeorological Advisories for crop protection & management

C. General and Agrometeorological Advisories for Ernakulum District (RRS Vyttila)

Special crop management is required for agricultural crops during monsoon season. Proper drainage facilities have to be ensured in the crop field. Provide supports for the bananas. Make the vegetable pandals stronger Pesticides should not be applied during rain. Avoid standing in open areas to protect farmers and livestock from lightning and thunder.

Rice (Pokkali) Management Management Sigatoka leaf spot disease Nutmeg Leaf fall Leaf fall After strengthening the outer bunds, setting the sluices and drying the field, farmers can start preparing mounds and seeds can also be procured. As a prophylactic measure to sigatoka leaf spot disease, spray 20g of pseudomonas in one litre of water. If Sigatoka attack is seen, spray one milli litre hexaconazole or one milli litre propiconazole per one liter of water on both the surface of the leaf. As a precautionary measure to manage leaf fall during rainy season, spray 1% bordeaux mixture. Pesticides should not be applied during rain. As a prophylactic measure to control quick wilt of pepper, add 2 kg	ingituming and thunder.
