Weather summary / Alert: Since dry weather condition is prevailed, irrigation of crops can be continued, when required. Below normal rainfall is expected in Kerala.

General and Agrometeorological Advisories for Thrissur District

Since there is a chance of dry weather condition due to strong wind and high evaporation, crops should be irrigated, when required. Since the wind speed is increasing, give strong propping to banana and staking to vegetables. Proper mulching can be followed to conserve soil moisture.

Crop	Pest/ Disease	Crop/ Animal Advisory
Rice (Mundakan) Maturity stage	Rice bug	There is a chance of appearance of rice bug in paddy. To control, spray 2 ml malathion per one litre of water. Pesticides application should be done either before 9 am or after 3 pm. Otherwise, the pesticide application will adversely affect the pollination.
Banana	-	The micro nutrient deficiencies of banana plants can be managed by applying 100 gram Ayar.
Banana & Coconut	-	Since dry and hot weather condition is prevailed, provide irrigation to banana and coconut plants as per requirement. Mulching can be practiced to conserve soil moisture.
Arecanut	-	The wood of arecanut tree can be protected from hot sun by painting white or covering with arecanut leaf sheath.

Animal Husbandry: - Ensure sufficient supply of clean drinking water to the animals. Take measures for preventing mosquito breeding near the cattleshed. (CAADECCS, KVASU, Mannuthy).
